2. Click Digital Crafting, then click My Digital Downloads.
3. You can browse the categories or enter an item number directly in the "Search the Store" box to select your items.
4. Click "**Add to Bag**" after clicking the image, then complete your checkout. If you qualify for **Stampin' Rewards** you can select those before you check out.
5. After you've checked out, an **Order Confirmation** page will open. Click the **Download Now** link next to the product you want to download, or click Download Manager. Clicking on either will open Download Manager. Download Manager will list all the products that you have purchased for download.
6. In Download Manager, click the operating system you are using (Mac or Windows). After you select your operating system, the file sizes appear next to each of the available downloads.
7. To download a file, click **For My Digital Studio**. If you click **For Other Applications**, Download Manager will download a version of the file that can be used in other programs, such as Adobe Photoshop.
8. When prompted, click **Run**. Click **Run** to have the image automatically placed in My Digital Studio so it will be available the next time you open My Digital Studio. We do not recommend that you click **Save**. If you click **Save**, your computer will save the file to your hard drive, and you will have to locate the saved file and run it (double-click, and then click **Run**) before the image is placed in My Digital Studio. (If you click **Save**, be sure to record where you saved the file.)
9. Repeat steps 7–9 for each download file that you've purchased. Download Manager has a section for past downloads. Your Stampin' Up! store account will maintain a record of the downloads you've purchased and will keep them available for future download. If you ever need to download a file again, visit your account and access Download Manager.

If you have any questions, please don't hesitate to [contact me](#)!

Sincerely,
Michelle Tech
